

Kingston Heading Service Counter Punch

Why Are We The Best Choice For Your Custom Tooling Needs?

Craftsmanship

All of the tooling we make is microfinished to the highest possible standard. Good tooling means longer tool life for you, and less production downtime.

Quality

We are certified to ISO 9001:2000 standards and are committed to our total quality system. High quality tools should be consistently accurate, reducing set-up variability and producing your parts to specification during the whole run. Our tooling meets that test of quality every day.

Value

You can't afford to spend more on tooling than you have to. After all, your fasteners have to be competitive too. We work hard to ensure that our costs, and pricing, are amongst the lowest in the industry.

Service

We specialize in custom tooling of all types. We make tooling that meets your needs and specifications, not ours. We make it quickly, too, with our agile production system. We treat our customers with the respect they deserve, and our service and support reflect that. Why look elsewhere for your tooling?
